

InvisiMarker[®]

PRODUCT INFORMATION

InvisiMarker[®] is a low-profile surface delineator designed for use with Invisible Structures' Grasspave2[®] and Gravelpave2[®] systems. It snaps directly into the grid to provide visual guidance for parking, fire lanes, and traffic delineation without creating trip hazards or disrupting surface performance.

COMPATIBLE SYSTEMS

- Grasspave2[®]
- Gravelpave2[®]

AVAILABLE COLORS

- Bright White
- Neon Yellow
- Fire Lane Red
- ADA Blue

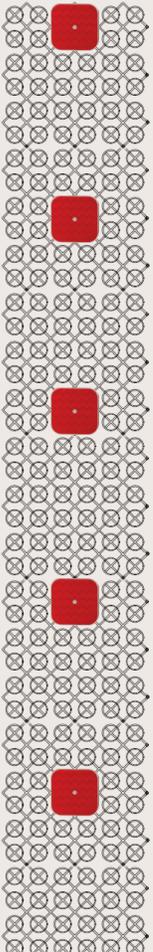

APPLICATIONS

- Fire lanes and emergency access routes
- Parking stall delineation
- Drive aisles and access paths
- Pedestrian and vehicular guidance within permeable paving systems

MATERIAL & CONSTRUCTION

- Durable molded plastic construction
- Designed to snap securely into paving grid units
- UV-stable and weather resistant

DIMENSIONS

Overall Width	5.664 in
Overall Length	5.664 in
Corner Radius	R 1.192 in (4 corners)

INSTALLATION NOTES

- Install InvisiMarker into empty Grasspave2® or Gravelpave2® units prior to infill placement.
- Ensure marker is fully seated and flush with the grid surface.
- Complete infill placement and compaction per system installation guidelines.
- Spacing between placed InvisiMarker tiles can be adjusted; every third or fourth potential placement is recommended
- For technical support, installation guidance, or specification assistance, contact Invisible Structures.
