PAVING
ROCKS**

PAVING THE WAY

The trusted choice for low maintenance porous paving since 1991, Gravelpave2® provides remarkable compressive strength (15,940 psi / 2,295,000 psf—five times that of concrete) and can support the weight of virtually any vehicle. Gravelpave2 is crafted with a 100% recycled plastic, ring-on-grid structure with a fabric backing that acts as a vegetation barrier, a dust inhibitor and provides true containment since it will never come off or disintegrate. A 92% void space allows for rapid stormwater drainage and filtration of environmental toxins through bioremediation.

MEETING STORMWATER REQUIREMENTS AND EROSION CONTROL

Because of our innovative design and specifications, you can meet Stormwater Requirements in less square footage than most porous paving types using Gravelpave2.

WHAT IS POROUS PAVING?

Porous paving is a type of pavement or surface material that allows water to pass through it, rather than creating a solid, impermeable surface. It enables rainwater to infiltrate the ground, reducing surface runoff and helping to return water to natural aquifers and restore groundwater.

ADA-certified and tested to meet the DOJ ADA requirements for a smooth and stable exterior surface.

WHAT IS THE URBAN HEAT ISLAND?

The urban heat island (UHI) effect refers to the phenomenon where urban areas experience higher temperatures than rural regions due to human activities and the modification of land surfaces. Urban areas have a higher percentage of impervious surfaces like asphalt and concrete, which absorb and retain heat more than natural surfaces. Gravelpave2 can make a difference.

WHY GRAVELPAVE2?

Created by a Landscape Architect, Gravelpave2 has been the trusted choice for low maintenance porous paving since 1991. With a compressive strength five times that of concrete, Gravelpave2 can support the weight of virtually any vehicle. Made from 100% recycled plastic, the lightweight and flexible rolls allow for quick and easy installation and can be easily trimmed for design versatility. Gravelpave2 is available in custom colors, making the possibilities limitless.

THE GRAVELPAVE2 ADVANTAGES

Gravelpave2

Stronger Compressive Strength (15,940 psi / 2,295,000 psf)

Rolls Out - Quicker to Install, Saves Labor

Permanent Fabric Backing Prevents Weeds, Rutting and Puddles

Lifetime Warranty with a Long Lifespan & Low Maintenance

92% Void Space for Drainage

All-Weather Applications

Toxin Filtration

Made From 100% Recycled Plastic

Available in Custom Colors

APPLICATIONS

Fire Lanes, Utility & Emergency Access Roads

Parking Lots

Driveways

Outdoor Event Spaces

Paths & Walkways

Ramps, Docks & Loading Areas

Airplane Taxiing Areas

Stormwater Management

IT'S EASY BEING GREEN

Sustainability starts from the ground up. Gravelpave2 not only protects the environment, but it also enhances it. All our products are made from 100% recycled plastic—plastic that goes into improving the environment and not into a landfill.

Other benefits include:

- Reduces erosion and soil migration.
- Reduces site disturbance.
- Contributes to airborne dust capture and retention.
- Promotes the conversion of carbon dioxide (greenhouse gas) into oxygen.
- Has an “air-conditioning effect” to help cool the atmosphere and reduce the Urban Heat Island effect.

BIOREMEDIATION

Through bioremediation, porous pavers can clean pollutants out of stormwater.

- Heavy metals: 96–99%
- Suspended solids: 95%
- Phosphorous: 65%
- Nitrogen: 82%
- Hydrocarbons: up to 100%

1.5 MILLION POUNDS

of recycled plastic are used every year for Invisible Structures products.

Sustainability

HUG A TREE

Concrete and asphalt suffocate and starve tree roots of air and water. With Gravelpave2, plant or retain as many trees as your site will allow. Gravelpave2 can come within inches of mature tree trunks without damage. Plus, our mats uniquely flex with tree root growth that would otherwise crack hard surfaces.

BEAUTY BELOW THE SURFACE

How can something that's invisible be beautiful? The end result is the real appeal. Gravelpave2 creates a more stunning surface and adds a unique look to a site.

THE FAULTS OF ASPHALT

Most paving solutions, like asphalt and concrete, distract and detract from the surroundings in the name of functionality. But Gravelpave2 gives you design flexibility to integrate your paving with your setting for a stunning, complementary solution.

GREAT SHAPE

Our trademark ring-on-grid design is what gives our products a competitive advantage. Evenly spaced rings make for a flexible yet strong structure with independent weight distribution and no stress points. You can create curves or customize layouts with pruning shears. It's a beautifully simple solution.

AVAILABLE COLORS

GravelPave2 is available in five colors (Granite, Black, Tan, Gray and Terra Cota). Granite is our newest color, and we highly recommend it, as it blends with just about any color of aggregate.

HARDWARE MADE EASY

All water-safe, galvanized steel, 8" landscape anchors and washers needed for your project are included with every order, and no other geotextile is required for installation. We've got you covered.

GRAVELPAVE2 INSTALLATION CROSS SECTION

ALWAYS ON A ROLL

Due to our trademark design and proprietary blend of HDPE 100% recycled plastic, our products offer distinct design and installation advantages.

Installation and Maintenance:

- Install 430 square feet of product with one person in five minutes.
- A full installation of the same size can be completed in about an hour.
- Trim with pruning shears or use our curve chart to easily create curves or customize layouts.
- The recommended max slope for Gravelpave2 is 5% for fire lanes, 8% for cars and lighter weight trucks and 15% – 20% for golf carts, pedestrian use and trails. For a slope greater than 20%, Slopetame3 may be used (up to 45%) and will support pedestrian and light vehicular traffic.

INVISIBLE STRUCTURES—STANDARD PRODUCT ROLL SIZES

Model	WIDTH		LENGTH		ROLL DIAMETER		AREA		WEIGHT	
	m	ft	m	ft	m	ft	m ²	ft ²	kg	lbs
1010	1	3.3	10	32.8	.5	1.7	10	108	24	53
2020	2	6.6	20	65.6	.8	2.7	40	430	96	212

BASE COURSE DEPTH RECOMMENDATIONS

	NORMAL TRAFFIC		ROLL DIAMETER		INFREQUENT PASSES	
	CBR 2-4	CBR > 4	CBR 2-4	CBR > 4	CBR 2-4	CBR > 4
Heavy Fire Truck & H-20 Loading Max 130 psi 95,000 lb	14 in	12-14 in	12-14 in	12 in	12 in	10-12 in
Light Fire Truck & H-15 Loading Typical 85 psi 60,000 lb	12 in	10-12 in	10 in	8-10 in	8-10 in	8 in
Utility & Delivery Truck & H-10 Loading Typical 60 psi 40,000 lb	8-10 in	8 in	8-10 in	6-8 in	6-8 in	6 in
Cars & Pick-Up Truck Access Typical 45 psi 8,000 lb	6-8 in	6 in	6 in	4-6 in	4-6 in	2-4 in
Trail Use and Cart Paths <1,000 lb	2-4 in	2-4 in	2-4 in	0-2 in	none	none

QUICK REFERENCE GUIDE FOR GRAVELPAVE2

DESCRIPTION	CONNECTABLE RING AND GRID SYSTEM
Description	Connectable ring, grid, and permanent fabric backing
Also Included	Water-safe, galvanized steel, 8" landscape anchors and washers
Available in Large, Flexible Rolls	Yes, various sizes
Colors	Black, gray, tan, terra cotta, granite, custom colors extra
Components Needed for System	Base course, 1 1/4" (3.2cm) of 3/16in to 3/8in decorative gravel, and labor
Traffic	Low speed, unlimited use
Compressive System Strength	Filled: 15,940 psi (2.29 million per sq ft / 109,906 kPa)
Life Span	Lifetime with proper maintenance
Recommended Maximum Slope	5% fire lanes, 8% car/light truck, 15-20% golf carts, pedestrian use, and trails
Stormwater Storage	Yes
Clean Pollutants through Bioremediation	Good
Air-Conditioning Effect	No
Heat Island Mitigation	Yes with light colored gravel fill—Albedo .16
Reduces Runoff and Non-Point Source Pollution	Yes
Recycled Content	100% recycled HDPE plastic with recycled remnant fabric
Erosion Control	Yes
Airborne Dust Capture and Retention	Good
Promotes and Retains Tree Growth	Yes
Recharges Groundwater	Yes

PSI STRENGTH

Case Study Online

PRIVATE RESIDENCE, CULVER CITY, CALIFORNIA

Gravelpave2, Grasspave2 and Rainstore3 were all used in this project to replace the cracking concrete and clay soil, which became slick and oily when wet. The yard space was increased, and the concrete driveway was eliminated to create a beautiful, sustainable environment for people and pets.

GROUNDING IN PERFORMANCE™

Invisible Structures is the leader in porous paving and stormwater management solutions. We enhance your project and the planet with strong, stylish, and streamlined solutions for:

GRASSPAVE2 | Grass Porous Paving
BY INVISIBLE STRUCTURES™

GRAVELPAVE2 | Gravel Porous Paving
BY INVISIBLE STRUCTURES™

RAINSTORE3 | Underground Stormwater Storage
BY INVISIBLE STRUCTURES™

SLOPETAME3 | Erosion Control
BY INVISIBLE STRUCTURES™

DRAINCORE2 | Drainage
BY INVISIBLE STRUCTURES™

BEACHRINGS2 | Portable ADA Access Mats
BY INVISIBLE STRUCTURES™

How long can an Invisible Structures product last? We'll get back to you. All maintained installations are still functioning and beautiful!

Gravelpave2 is the BMP choice for the EPA, US Army of Engineers, Center for Watershed Protection, and many other Federal and state agencies.
